

Lovibond® Water Testing

Tintometer® Group

New photometers: PM 630 and MD 610 with Bluetooth®

We have expanded our photometer series with the PM 630 and MD 610. The PM 630 is a multi-parameter instrument built to analyze water in pools and spas. The MD 610 targets the analysis of industrial wastewater and potable water.

Both devices are equipped with Bluetooth® to enable data management and data exchange with your tablet or smartphone. Further, the instruments interact with our Lovibond® AquaLX® App. This app is free of charge and can be downloaded in Android™ and iOS® versions. All collected results can be viewed on a smart device and the user can send results via email.

The PM 630, MD 610 as well as the app are available with immediate effect. To celebrate the launch, we are offering a special price for a limited time (click [here](#) for your personal offer). We are also pleased to offer an online product training for customers who wish to learn more about these new products. Registration will be open until June 30, 2015 – for questions regarding this training, please contact Mr. Thorsten Minichshofer [by email](#).

Please visit our website for further information or contact our sales team.
